01편 - Baird의 삶

The Life of Baird

① Baird, who was born in Helensburgh, Scotland, studied electrical engineering at the Royal Technical College in Glasgow and then went to Glasgow University.

② His poor health prevented him from active service during World War I and from completing various business enterprises in the years following the war.

③ After a breakdown in 1922 he retired to Hastings and engaged in amateur experiments on the transmission of pictures.

④ Using primitive equipment he succeeded in transmitting an image over a distance of a couple of feet, and in 1926 he demonstrated his apparatus before a group of scientists.

⑤ Recognition followed, and the next year he transmitted pictures by telephone wire between London and Glasgow.

⑥ In the same year he set up the Baird Television Development Company.

⑦ He continued to work on improvements and on 30 September 1929 gave the first experimental BBC broadcast.
